A LITTLE BIT ABOUT YOU ...

Course Content

- Course Overview
- **Module 1:** Ansible, Automation and Configuration Management
- **Module 2:** Getting Started with Ansible
- **Module 3:** Ansible Playbooks
- **Module 4:** Handlers, Variables, Roles and Code Reuse

Book and Further Learning

- This course owes a lot to the book “Ansible for DevOps” by Jeff Geerling.
- RedHat has quite a lot of content at <https://developers.redhat.com/learn/ansible> and [Experience Ansible Automation Platform with Self-Paced Labs](#) including some tutorials with provisioned lab resources.
- The docs: https://docs.ansible.com/ansible/latest/user_guide/
